

**REMARKS**

Claims 17-24 are objected to under 35 U.S.C. 112. This objection is overcome in view of the amendments to claims 17 and 24.

Claims 17-24 are rejected under 35 U.S.C. §103(a) as being unpatentable over **Stanesti et al.** [hereinafter Stanesti] [6,977,482] and **Smart Battery System Specifications @ <http://www.sbs forum.org/specs/sbsel100.pdf>.** Claims 17-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over prior art disclosed by applicant **Shyr et al.** [hereinafter Shyr] [5,903,764] and **Smart Battery System Specifications @ <http://www.sbs forum.org/specs/sbsel100.pdf>.** These rejections are traversed in view of the amendments to claims 17 and 24.

Independent claims 17 and 24 include: ... an electronics device, each respective electronics device being coupled to the controller to jointly control charging and discharging of a rechargeable cell in the associated smart battery, each rechargeable cell being coupled in series to a charge switch and a discharge switch whereby, during a discharge operating condition, each respective electronics device monitors the energy level of its rechargeable cell, and when requested by the controller, provides energy to the IHS and notifies the controller when the energy level falls below a threshold level, and during a charge operating condition, each respective electronics device receives a charge and transfers the charge to its rechargeable cell, when required.

As the PTO recognizes in MPEP §2142:

The Examiner bears the initial burden of factually supporting any *prima facie* conclusion of obviousness. If the examiner does not produce a *prima facie* case, the applicant is under no obligation to submit evidence of nonobviousness.

The USPTO clearly cannot establish a *prima facie* case of obviousness in connection with the amended claims for the following reasons.

35 U.S.C. §103(a) provides that:

[a] patent may not be obtained ... if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains ... (emphasis added)

Thus, when evaluating a claim for determining obviousness, all limitations of the claim must be evaluated. However, the references, alone, or in combination, do not teach an electronics device, each respective electronics device being coupled to the controller to jointly control charging and discharging of a rechargeable cell in the associated smart battery, each rechargeable cell being coupled in series to a charge switch and a discharge switch whereby, during a discharge operating condition, each respective electronics device monitors the energy level of its rechargeable cell, and when requested by the controller, provides energy to the IHS and notifies the controller when the energy level falls below a threshold level, and during a charge operating condition, each respective electronics device receives a charge and transfers the charge to its rechargeable cell, when required.

Therefore, it is impossible to render the subject matter of the claims as a whole obvious based on a single reference or any combination of the references, and the above explicit terms of the statute cannot be met. As a result, the USPTO's burden of factually supporting a *prima facie* case of obviousness clearly cannot be met with respect to the claims, and a rejection under 35 U.S.C. §103(a) is not applicable.

There is still another compelling, and mutually exclusive, reason why the references cannot be combined and applied to reject the claims under 35 U.S.C. §103(a).

The PTO also provides in MPEP §2142:

[T]he Examiner must step backward in time and into the shoes worn by the hypothetical "person of ordinary skill in the art" when the invention was unknown and just before it was made. In view of all factual information, the Examiner must then make a determination whether the claimed invention "as a whole" would have been obvious at that time to that person. ...[I]mpermissible hindsight must be avoided and the legal conclusion must be reached on the basis of the facts gleaned from the prior art.

Here, the references do not teach, or even suggest, the desirability of the combination because neither teaches or suggests providing an electronics device, each respective electronics device being coupled to the controller to jointly control charging and discharging of a rechargeable cell in the associated smart battery, each rechargeable cell being coupled in series to a charge switch and a discharge switch whereby, during a discharge operating condition, each respective electronics device monitors the energy level of its rechargeable cell, and when requested by the controller, provides energy to the IHS and notifies the controller

when the energy level falls below a threshold level, and during a charge operating condition, each respective electronics device receives a charge and transfers the charge to its rechargeable cell, when required.

Thus, neither of these references provides any incentive or motivation supporting the desirability of the combination. Therefore, there is simply no basis in the art for combining the references to support a 35 U.S.C. §103(a) rejection of the claims.

In this context, the MPEP further provides at §2143.01:

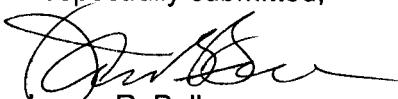

The mere fact that references can be combined or modified does not render the resultant combination obvious unless the prior art also suggests the desirability of the combination. (emphasis in original)

In the above context, the courts have repeatedly held that obviousness cannot be established by combining the teachings of the prior art to produce the claimed invention, absent some teaching, suggestion or incentive supporting the combination. In the present case it is clear that the USPTO's combination arises solely from hindsight based on the invention without any showing, suggestion, incentive or motivation in either reference for the combination as applied to the claims. Therefore, for this mutually exclusive reason, the USPTO's burden of factually supporting a *prima facie* case of obviousness clearly cannot be met with respect to the claims, and the rejection under 35 U.S.C. §103(a) is not applicable.

In view of all of the above, the allowance of claims 17-24 is respectfully requested.

The Examiner is invited to call the undersigned at the below-listed telephone number if a telephone conference would expedite or aid the prosecution and examination of this application.

Respectfully submitted,

James R. Bell
